EDUCATION

G. B Pant Institute of Engineering and Technology **2023 – 2027**
Bachelor of Technology (B.Tech) – Computer Science and Engineering | CGPA: 7.89/10 *Pauri, Uttarakhand*

TECHNICAL SKILLS

AI / GenAI: Agentic workflows, tool-calling, LangChain, RAG, Pinecone, custom model endpoints
AI-Assisted SDLC: Cursor, Claude Code, GitHub Copilot – design, code generation, reviewing AI output, automated testing
Languages: Python, TypeScript, JavaScript (ES6+), Java, C++, SQL, HTML/CSS
Frontend: React.js, TypeScript, Next.js, React Native, Redux, Zustand, TanStack Query, Tailwind CSS
Backend & Data: Node.js, FastAPI, Express.js, Spring Boot, REST APIs, PostgreSQL, MongoDB, Redis, Prisma
Cloud & DevOps: GCP, Docker, Vercel (serverless), GitHub Actions CI/CD, Postman
Core CS: Data Structures & Algorithms, OOP, Git code review, CI-driven PR workflows, Unit/integration testing

EXPERIENCE

SiteGuide **July 2025 – Aug 2026**
Software Development Intern *Remote*

- Built **Jarvis**, a **RAG-based agentic voice agent** spanning the full software ecosystem of a trading and content platform, with **tool-calling**, **LLM integrations** and **custom model endpoints** (LiveKit, LangChain, Pinecone, Redis) for real-time conversations.
- Added backend features to a trading platform serving **~50K users**, and engineered a Udemy-style **edtech platform** with live courses and Mux video streaming.
- Shipped **5+ production full-stack apps** (web & mobile; legal-tech, e-commerce, B2B SaaS) with **Node.js, Spring Boot, PostgreSQL**, Next.js and React Native, owning design through deployment, testing and **code review**.
- Automated lead capture and WhatsApp/email follow-ups with **Pabbly** and **SendFox**, with Google Sheets analytics.

BetterMyStay **April 2024 – August 2024**
Software Development Intern *Remote*

- Built a React Native CLI module integrating the **Cashfree payment gateway** end-to-end (transaction flow, error handling, callbacks), delivering **plug-and-play** payment integration and cutting developer onboarding time.
- Collaborated with the backend team to define API contracts for transaction-status callbacks, ensuring reliable handling of payment success/failure states across the client.
- Designed subscription and media UIs in Figma and shipped a responsive React landing page, **improving accessibility and reducing page load time**.

FuelCab India **October 2023 – January 2024**
Software Development Intern *Remote*

- Built React.js/Tailwind CSS web solutions focused on code maintainability and customer experience; streamlined delivery workflows, **cutting release time by 15%**.

PROJECTS

SitePulse – AI Web Performance Analyzer | Next.js | TypeScript | Zod | LLMs (Groq) | GitHub Actions | Vercel **Mar 20**

- Built a serverless auditor merging **Lighthouse 13**, real-user **Core Web Vitals** telemetry and security grades into one Zod-validated report; long-running audits (100+ sec) run in-browser to bypass serverless time limits.
- Designed a **provider-agnostic LLM layer** (6 presets, model fallback) for **evidence-grounded** insights and chat; its automated **eval suite** (grounding, prompt injection) reached **24/24 checks, 100% grounding** at $0.
- Shipped an automated **GitHub Actions performance gate** that audits every Vercel preview (median of 3 runs) and posts AI-explained PR comments.

ProofLoop Digital Approval System | Java | Spring Boot | Next.js | MongoDB | Docker **Feb 2026**

- Built a **workflow approval platform** (Spring Boot + Next.js) with conditional routing, parallel stages, SLA escalation, delegation and a **SHA-256 hash-chained, tamper-evident audit trail**.
- Hardened auth (httpOnly sessions, rotating refresh tokens, CSRF, RBAC, optimistic concurrency), fixed IDOR and privilege-escalation bugs; **60+ unit/integration tests** automated in GitHub Actions CI.

Voice-Guided AI Tutor | Next.js | FastAPI | LiveKit | Deepgram | ElevenLabs | OpenAI **Oct 2025**

- Built a **real-time agentic voice tutor** (LiveKit Agents, Tavus avatars, Deepgram STT, OpenAI, ElevenLabs TTS) on an async FastAPI backend handling concurrent sessions.

ACHIEVEMENTS

- **GATE CSE'26 Qualified, AIR 8k | 400+ problems solved:** Codolio Profile
- **Hackathons:** Navdhara 2024 Finalist (Top 10, Fire Alignment in NLOS); **1st Prize**, Manthan 2024 RoboSync (COER University, 30+ teams).
- **Leadership:** Campus/Student Ambassador for **GeeksforGeeks**, **AlgoZenith**, and **IEEE** – organized workshops and mentored peers.
